## Land Capability and Conservation Measures

Place a check mark in the ONE square indicating the most intensive use that can be made of land for each site. Assume recommended conservation and management practices are followed. Score 5 points for each correct answer for LAND CAPABILITY.

Class	Land Capability	Site			
		1	2	3	4
I	Very intensive cropping				
II	Intensive cropping				
III	Moderate cropping				
IV	Occasional cropping				
V	Continuous cover				
VI	Continuous cover				
VII	Continuous cover (forest)				

Major factors that keep site out of Class I. Correct answer must include each factor preventing the site from being Class I. Score 5 points for correct answer on each site.

Limitations	Site			
	1	2	3	4
Slope				
Amount of erosion				
Erosion potential				
Texture and workability				
Depth				
Aeration and drainage				
Ability to supply moisture				
Flooding				

Check ONE square per site for each category. Score 4 points for each correct answer.

### Tie-Breaker Policy:

In the event of a total score tie, use the following land judging category score to determine winners:

1. Conservation Measures (if a tie still remains, refer to the next category).
2. Limitations (if a tie still remains, refer to the next category).
3. Land Capability.
4. Soil Characteristics (if a tie still remains, refer to the slope section of the Soil Characteristics category).
